

The IDEAL (Inclusive Digital Education for Autistic People Learning) project started in 2022 to address the lack of accessible online tools, trained professionals and educational methodologies adapted to autistic people in need of a high level of support.

IDEAL will develop an adapted Learning Management System for Vocational Education and Training that will be fully accessible for autistic people. It will integrate educational methodologies to evaluate different digital tools according to their usefulness for autistic people.

**Partners:** University of Burgos (Spain), Fundación Miradas (Spain), Fondacija hiljadu želja (Serbia), FPDA Portuguese Federation for Autism (Portugal), Tady to mám rád (Czech Republic), Abadía Tecnológica (Spain) and Autism-Europe (Belgium)

@autismeurope

@autismeurope.AE

The pathway to digital readiness of autistic people, their families and education professionals requires accessible digital technologies (training platforms and specialized training for education professionals in the use of these technologies).

### **Objectives:**

- To develop a Learning Management System following accessibility requirements for autistic students
- To evaluate different digital tools according to their usefulness for autistic students following a person-centered approach
- To deliver a methodology for digital training

Co-funded by the  
Erasmus+ Programme  
of the European Union
